Former retail store representative, programmer in training with a love for learning new things, coding, and problem solving. Seeking a position as a junior software developer where I can collaborate with others to create practical programs that others can utilize in their daily lives.

TECHNICAL EXPERIENCE

Stock Trading Simulator (in progress)

- The program will take historical stock data and allow users to test their trading strategies in a risk-free environment.

Command-Line Vending Machine

- Collaborated to create a functioning vending machine in Visual Studio using the principles of object oriented programming and File I/O.

National Parks Database

- Created an application that pulls from a database and allows the user to book a reservation. Effectively utilized Git, MS SQL, queries, unit-testing and the principles of OOP.

National Parks Web Application

- Designed the backend for a web application that allows users to view various web-pages and fill out a survey with their information. Used Git for collaboration, MS SQL, ASP.NET MVC, and Selenium for testing.

TECHNICAL SKILLS

- **Object Oriented Programming:** C#, .NET
- **Web Application Development:** HTML5, CSS, ASP.NET MVC
- **Database Programming:** SQL Queries, MS SQL
- **Development Tools and Techniques:** Git, Unit Testing, TTD
